

MasterKey 2.0 Updated Build No. 2018.12.09.98

This revision of MasterKey2 is for Revit 2017, 2018 and 2019

[Updates and Fixes made in this Release to MasterKey2 for Revit 22.06.2018](#)

Updates

1. Warning notes if Revit session disconnected from internet now stacked in front of Revit window to ensure that the user re-established the session link with the NG2 server online.

Fixes

1. Syntax error in the task bar fixed.

2. If a selection clause is removed from a specification, the User Keynotes are now updated to reflect in the User Keynote description as "Removed". This allows for early identification in the drawings which refers to any removed specification content that was referenced in a User Keynote. At that point any "Removed" User Keynotes can be simply be deleted or reallocated in the Revit session to another appropriate keynote.

NB. Please ensure all users within your organisation have the same build number when working on a workshare project
