MasterKey4 v1.0

Build No. 2025.8.7.2024

This revision of MasterKey4 is for use with Revit 2025 ONLY

Release Notes and Updates on 10.07.2024

MasterKey4 v1.0 for Revit 2025 is a totally new build with new coding but it is based on the functionality of the version 3 MasterKey. It is designed to work with new and upgraded projects in Revit 2025. The reason for the new version to accommodate the new build of Revit 2025 which has been upgraded to incorporate Microsoft's .NET 8 framework and to accommodate new features and functionality.

Key improvements include:

Real-time Updates:
Eliminating the need for manual refreshing, new content from the specification is now directly updated into MasterKey. The refresh key has been repurposed to save the content pack to the project keynotes file, updating the project and informing other users of the updated content.

Notation of Instance Changes to Keynotes:
This version highlights specific changes in the content (in orange text) rather than highlighting the entire project tree. This feature will reduce the need for frequent saves to central, as you can now make an informed decision on whether to accept the update and/or save the keynote changes to the project folder.

Dark Mode Compatibility:
We understand that many of you prefer working in dark mode, which is unhelpfully accessed through File > Options > Colour > UI active theme. This new feature aims to reduce eyestrain.

Automated Communication:

With the new .NET format, we have been able to automate many of the updates between the specification and the application. Additionally, we have significantly improved the speed of the send and receive function for MasterKey4 for Revit 2025.

Enhanced Search Function:

Now you can enter multiple text strings to filter your results for both content and project names.

UI Update:

We have refreshed and updated the applications icons to help. Icons also compatible with both UI theme of Dark and Light.
