

MasterKey 2.0 Updated Build No. 2021.09.17.99

This revision of MasterKey2 is for Revit 2019, 2020, 2021 and 2022

Updates

1. After recent ISP access issues, MasterKey has been updated to allow users to pause and reconnect the connection to Masterspec servers instead of having to remove the application for that interrupted service period.

Warning notice for interrupted internet connection has been updated.

The message window will be displayed but will not be removed until the connection is restored.

"Retry" button will attempt to reconnect online to the Masterspec server.

"Cancel" button will close the window but allow you to continue working but will activate again if connection is not restored.
